

# AI-Based Health Report

Parameter	Value	Risk (%)	Probable Health Risk
Room Temperature	30.5	30%	Mild Hypothermia
Humidity	60.0	0%	No significant risk
Body Temperature	37.2	N/A	None
Gas Value (Alcohol)	1700.0	50%	Alcohol Intoxication
Heart Rate	78.0	0%	Normal Heart Rate
SPO2	96.5	0%	Normal Oxygen Saturation
Latitude	13.036956	N/A	None
Longitude	77.5946	N/A	None

## Medical Terms Explained:

Mild Hypothermia - Mild decrease in body temperature leading to shivering and discomfort.

No significant risk - Optimal humidity level for comfort and health.

Alcohol Intoxication - High alcohol content in the blood affecting coordination and judgment.

Normal Heart Rate - Healthy resting heart rate in adults.

Normal Oxygen Saturation - Optimal oxygen level in the blood for proper functioning.

## Suggestions & Precautions:

Increase room temperature slightly or wear warmer clothing.

Maintain current level, no action needed.

Limit alcohol consumption and hydrate with water.

Maintain regular exercise and healthy diet.

Continue healthy lifestyle habits.
